***FINAL REJECTION***

Claims 14-19 remain rejected under 35 U.S.C. 102 (e) as being anticipated by Vargha (US Pat. 6,069,516) and Kobayashi (US Pat. 5,821,825) as shown in the last office action.

Claims 1-13 remain rejected under 35 U.S.C. 103 (a) as being unpatentable over Vargha (US 6,069,516) in view of Ko et al. (US Pat. 6,028,496) as shown in the last office action.

***Response to Applicant's Arguments***

Applicant argues that Vargha and Kobayashi fails to teach using a MOSFET as an active inductor. The argument is not persuasive because the recitation "active inductor" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Applicant argues that there is no motivation to combine the Ko et al reference with Vargha reference. The argument is not persuasive, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in

Art Unit: 2816

the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the gate of the MOS transistor in the Vargha reference is not connected to a resistor while the MOS transistor (MT4) of Ko et al is connected to a resistor for reducing a gate current to protect the MOS transistor. Thus, employing the protective resistor taught by Ko et al in the circuit of Vargha would have been obvious to a person having skill in the art. Also, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CAR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2816

CAR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
